

High strength
combined with high flexibility:
PR170 (Spachtel)

One for all!

High strength combined
with high flexibility.

Repairing, modelling or bonding – the FRANKEN SYSTEMS Spachtel PR170 is suitable for a wide range of applications in the simplest way:

- Levelling on vertical and horizontal surfaces
- Repairing and filling hollow spaces and defects
- Bonding rails and profiles

Odourless in application and without solvents, the filler hardens in one hour and can be reworked in many ways.

Compatible with:

SYSTEM
FRANKO **SIL**[®]

SYSTEM
REVO **PUR**[®]

SYSTEM
FRANKO **LON**[®]

Benefits

- Reacts from -10°C to +50°C
- Odourless and solvent-free
- Flexible despite high strength
- Label-free for road transport
- 1 kg kneading bag
- Adheres to almost any surface

Handling

- If the Spachtel PR170 is sanded when fresh, it can be recoated within a very short time with our one-component liquid plastic FRANKOSIL® 1K Plus. Other typical construction products also achieve good adhesion on the sanded surface.
- The products from the REVOPUR® system can also be processed within 12 hours without being sanded beforehand. The filler can be applied directly from the practical kneading bag – simply cut off a small corner and distribute it specifically on the component.

Technical data

Processing time
approx. 20 min*

Can be reworked / walked on after
approx. 45 min*

Can bear weight after
approx. 1 h*

Colour shade
approx. RAL 9018 (papyrus white)

* Measurements taken at 21°C and a rel. humidity of 50%. Weather conditions such as wind, humidity and temperature will change the specified values. For further information, please refer to our technical data sheets. You can find these in the download area on www.franken-systems.de.
